

BREMICK®

GATE HARDWARE

2021

The Gate Hardware Range Offer

The new Gate Hardware range by Bremick offers an extensive listing of functional products for gate construction – covering assembly and joinery of gates, maintenance, and repair work. The new product suite is positioned as **high quality, well-informed and competitively priced**.

Bremick has successfully **modernised** a Gate Hardware range for new and existing customers. There will be a close eye placed on how the Gate Hardware landscape continues to evolve in order to ensure that its range meets **construction and market** requirements.

Packaging & POS

This customer-centric range meets market demands in **both coastal and rural areas**. **Product literature, point of sale** and card artworks have been created with application in mind – informing end users on whether each product is suitable for metal or timber gates.

The complete **124 product range** is comprised of various corrosion-resistant finishes such as **Zinc, Galvanised and Stainless Steel**, but also decorative finishes such as **Black and Satin Chrome**. Packaging types have been engineered for each specific product – with heavier products featuring double blister packaging and lighter products featuring single blister packaging.

GATE HARDWARE for DIYers & Trades

- GALVANISED** Outdoor heavy duty use
- STAINLESS STEEL 304/316** Outdoor/Indoor use in coastal areas
- ZINC** Indoor use
- BLACK, CHROME PLATED & SATIN CHROME** Outdoor/Indoor use, where an architectural finish is desired
